

GLASS PROTOCOL POLICY:

- 1.1 For measurement of temperature only calibrated dial gauge thermometer would be used apart from thermostat sensor in place of glass thermometer in plant & Engg. Where feasibility for sensor thermometer is not there, the glass thermometer with protective covering shall be used.
- 1.2 In laboratory all glassware would be replaced gradually by material made of plastic/ fiberglass of food/lab grade, which is readily available in the market.
- 1.3 Glass panes would be gradually replaced in phases by fiberglass and glass panes in risk area i.e. food handling areas would be protected by wire mesh.
- 1.4 All tube light & bulbs in food handling area would be given protected covering.

View glass / port of milk storage tank would be replaced by transparent fiberglass.
